

Track record of delivering early revenue solutions

Artificial lift, EOR and production facility solutions

Alkhorayef Special Projects Group have extensive experience of providing customers with tailored solutions to quickly produce from conventional and heavy oil reservoirs with Early Production Facilities (EPF), Enhanced Oil Recovery (EOR) techniques and Artificial Lift Systems.

Alkhorayef solutions have delivered access to an early source of revenue for operators, whilst gathering reservoir performance data that validates the feasibility of recovery techniques.

A variety of commercial models give clients the flexibility of outsourcing large scale projects to a single contractor. The management of the project, by Alkhorayef, from inception, through to design, installation, commissioning as well as operation and maintenance, enables increased efficiencies and cost savings by capitalizing on the expertise and innovation of Alkhorayef.

The Special Projects Group established in 1996 to supply ESPs is currently the largest provider in the Kuwaiti market (>60% market share). The company has since become an established name in the regional Oil and Gas industry involved in multiple pioneering projects.

KUWAIT

KEY PROJECTS

- 2006 Warra Water Flood
- 2007 Marrat Water Flood Project
- 2008 Lower Fars Cold Heavy Oil Production with Sand
- 2010 Gathering Centre (GC-16)
- 2014 Large Scale Thermal Plant – North
- 2015 Large Scale Thermal Plant – South

ENHANCED OIL RECOVERY TECHNIQUES

- Water Flooding
- Cold Heavy Oil Production with Sand (CHOPS) processing plant
- Steam Flooding

SURFACE TREATMENT PUMPING SYSTEMS

- Electrical Submersible Pumps
- Horizontal Pumping Systems
- Sucker Rod Pumps
- Progressing Cavity Pumps

COMMERCIAL MODELS AVAILABLE

- Build Own Operate
- Build Own Operate Transfer
- Operation and Maintenance
